

Snakes and Ladders

Create a Snakes and Ladders game using key words for children in Key Stage 1 and 2.

- If designing your own game chose 12 common words and intersperse them with the Childs own key words - the teacher will have a list, you could also use words you have been working on, ensure that you do not make it too difficult.
- You will also need a dice and 2 counters.
- When playing ask the child to read out each word they land on and make sure they win!
- Add or change the words when the child is ready.
